

Dear Alan,

I have retyped letters from Holland 1, 2, 3. I found also 2 necessary, in spite of the Bo leaf. It is useful when the whole series, ~~except~~ "Right Under Reality" is together, comes like that in your catalogue. My no 4 Intro to Abh. is in that small booklet as "Abh. and Practice", but I am making some revisions and ^{will} also retype it now to have it in the

series. Is that O.K.? The numbering will be only different in so far as I leave out one letter; Underst. R. — Ven. Bodhi made some changes I dislike; about the body as a whole, changes stemming from lack of right practice. —

What next? You never saw Tokyo letters I-VI and Sri Lanka Revisited, and some ^{other} letters, you mentioned before

the perfections first. Or
do people ask for Pupa
and Cetasikas? They all
need retyping, since the
originals are not well
typed. Please let me
know.

I received several tapes in
Thai with text reference.
very nice comm. explanation
about Anthill setta, middle
h. I, p 183. The bolt is
ignorance, one is locked in by
", as the town is closed at night
by a bolt - now I break off,

too busy. Just received your
letter of 30-1 - I have to read
letter now almost finished I

do not think of a booklet, but I
want all articles retyped and in
England. I think of the far future.

So, perhaps I go on with Tokyo?

I see
you
have

Have you ever had booklet: Pilgrimage to S. h. ?? I should retype it.

difficult
maybe to
copy the
booklet?

And S. h. Revisited: I only have
a messy copy and worked on it with
scribbles for revision. Intro p 3
missing, what kind of copy do
you have? Is it my typewritten,
or done in Thailand ??

2

I cannot copy from it but will retype Intro, the whole forms number 1 + 2, the missing page I can copy and will send to him myself, I have his address.

I am thinking that it will be nice if I retype soon some old letters you have not yet and which are helpful for beginners, like some more to Susie and Blanche. What do you think of that type of letter, of which you have some already?

Hodewijk and I want to send you £50 - for your fund, since it is useful and it then ^{in that way} there ^{will} ^{always} be some money for giving booklets as you do already. You do not mention your account no on the catalogue, it would be useful if you tell people. How do you wish us to make it over? Eurocheque? But on the name of the Fund?? Please let us know.

It is encouraging you have reactions about the material

every week. The way you do it with the catalogue and making copies is good. The book-lets have to be in larger numbers and so they can be made now and then, depending on how it goes.

Best wishes,
Nina.

Clapping with one hand, I read about it in a Zen book. I am not so interested in it.

Intro to Book of Analysis: he also says good things, but misunderstands about abuse and control. We could never convince people like the footles who are set in special techniques.
